

ANDREW GOULD JOINS FORCES WITH NUPAFEED

Nupafeed are the proud new sponsors of International dressage rider and trainer Andrew Gould. Andrew has been feeding the Nupafeed Calmer for many years and has always raved about its fantastic results. Nupafeed have formalised their long-standing relationship with Andrew and the pair are delighted to be able to promote the Nupafeed range together.

Andrew is currently feeding Nupafeed Liquid Calmer to quite a few of the horses that are in training with him. Andrew explains: "I truly believe this is the best calmer on the market. If I have anything that is tense or spooky I always put it onto Nupafeed Liquid Calmer and I notice

a positive difference very quickly. One of the horses that I feed this to went to his first competition just a week ago. I was concerned that the stress of the journey and competing in new surroundings would be too much for him. However he traveled to the event brilliantly and performed in his test beautifully, winning his class. I couldn't have been happier. I have no doubt that the Nupafeed Liquid Calmer helped keep him calm, relaxed and allowed him to perform at his best."

BATES AND WINTEC INTRODUCE ELASTIC GIRTHS WITH CAIR

Research has shown that concentrated pressure on a horse's sternum is not only uncomfortable for the horse but impedes performance. The CAIR Cushion System uses air technology and presents the first solution for dispersing pressure evenly over a greater area. The fluid cushioning of air results in unprecedented comfort and improved performance for your horse.

These revolutionary girths are scientifically proven to dramatically improve your horse's comfort and performance by: Evenly distributing pressure, dispersing pressure over a larger surface area, fluidly working with the horse's muscles, providing symmetrical give for your horse's expanding chest, being anatomically shaped for improved freedom of movement.

Available
in a
comprehensive
range of sizes and
colours with prices from

£149.00 for Bates Elastic Girth with CAIR and £99.00 for Wintec Elastic Girth with CAIR

Available from leading saddlery stores, for stockist information visit: www.batessaddles.com.

NEW PACKAGING FROM DODSON AND HORRELL

Dodson & Horrell is delighted to report on the success of the launch of its brand new range of horse feed packaging. After the September launch of the first nine bags, including Build Up Mix and Cubes, the new and improved Thoroughbred stud range was recently launched at the Cheltenham Thoroughbred Breeding & Racing Seminar.

The new look bags have been well received, both in terms of their appearance and the information printed on them. New features include simplified feeding guidelines, concise product benefits on the front of the bag, the inclusion on our unique fibre+ package and striking black and white photography. Alongside the changes, the now familiar colours of the bags have been retained to help owners continue to choose the right feed.

Given the size of the Dodson & Horrell range, the remaining new bags will launch over the course of the next 7-8 months, with the Competition range scheduled for March 2009.

For more information on the Dodson & Horrell range or to discuss feeding your horse, please contact the Dodson & Horrell Helpline on 0845 345 2627 or visit www.dodsonandhorrell.com

THE BERKELEY GROUP SPONSOR TALENT SPOTTING FINALS 2009

Founded in 1976, The Berkeley Group is a leader in the business of urban regeneration, breathing new life into disused, unloved land in London and the South East. Its building divisions, including Berkeley Homes, St James and St George, transform brownfield sites into stunning mixed-use developments where people can live, work and play. Its multi-award winning developments combine leading edge design with a sensitivity to the heritage and character of each individual site, and range from grand scale destinations to smaller, more intimate communities. Most famous, perhaps, are its transformation of Gunwharf Quays in Portsmouth and the regeneration of the historic Royal Arsenal in Woolwich, but each and every one of its schemes share the same unvalued blend of style, innovation and relentless focus on quality.

Berkeley is also at the forefront of sustainable development, committed to creating a legacy for the built environment of which this generation can be proud.

The company was delighted that its commitment to continuous improvement was recognised this year, with the award of the Queen's Award for Enterprise (Sustainable Development). It is an achievement that Berkeley will build on as it continues to transform the hearts of towns and cities across the South East.

For more information on these or other Berkeley Group developments visit: www.berkeleygroup.co.uk
